

6160 IMDS/REACH – checking, analysing and creating of materials

Goal

You know the contents of the ELV Directive 2000/53/EC including Annex II containing a description regarding the usage of hazardous materials. You are able to make correct declarations of prohibited materials and to substitute materials if applicable. You are confident with the meaning of the different material classifications and you are able to choose the correct application codes. You know which substitutes for prohibited materials or basic substances need to be used as far as known on the date of the training.

Content

- Introduction
 - Initial situation of the legislation (ELV)
 - Background information of the automotive industry
 - General information on and background of REACH
- Legislation
 - Contents
 - Prohibited materials
 - Importance of the REACH-SVHC in the automotive industry
 - Substitution of prohibited materials (e.g. lead-free soldering)
 - Dates / transition periods
- Creation of a material data sheet
 - Material classifications in the IMDS
 - Meaning and assignments
 - Classifications by using prohibited materials
 - Application codes
- Creation of a material data sheet
 - Usage of standard materials and the GADSL
 - Standard materials
 - GADSL and SVHC
- Advanced guidelines of the EU
 - Meaning of WEEE and RoHs in the automotive industry
 - Foresight
 - Advanced services

The safety and correctness of material data sheets in the IMDS are an essential aspect for the car recycling. Parallely a correct material reporting requires not only a funded knowledge of the own product-composition, but also a good knowledge of the IMDS-requirements and of the general IMDS-directives. This training informs you about all requirements in detail and shows you the way for a correct data declaration and a safe valuation of materials and basic substances.

This training is exclusively in charge of Dr. Helmut Traiser, official commissioner for the material data management by the IMDS Steering Committee.

Training method

Presentation and demonstration with practical exercises.

Participants

As responsible person of quality, construction, laboratory, environmental management etc. you are already familiar with the creation of material data sheets and you would like to improve your data quality.

Requirements

Basics knowledge in the use of PC's and the internet as well as a good general knowledge of the IMDS-application.

Training duration

1 day, from 9 a.m. to 5 p.m.

Maximum number of participants: 12

Personal training licence

In our trainings you work on the special training system of EDS. Additionally you receive a cost-free ID for a personal training licence valid for 4 weeks after the training.

Certificate

As a participant of our authorised IMDS-trainings you receive a personal certificate to prove your IMDS-qualification.

Training documents

You receive a personal exemplar of the presentation that is used in our training. Further information can be found in our download-area in the internet. Here you may also order our IMDS-expert information.

Public training

Current prices and dates can be found on our internet site www.imds-professional.com.

Exclusive training

You can also book this training exclusively. Then we would charge a daily fee. Your advantage: You set time, place and number of participants. If preferred we also take over the whole organisation for you.

We also provide you with our room facilities and technics. If preferred, we also take care about service and catering.

Please request your personal offer:
