

6150 REACH in the automotive industry

Educational objective

The participants know the backgrounds and aims of the REACH-directive and learn which company areas are affected. They know, when a registration of substances is necessary and about their duties regarding uses and potential authorization and restriction of substances and preparations. The participants are capable of using the IMDS to identify REACH-relevant substances and can analyse own and incoming material data sheets in relation to REACH. The participants know about their duties to inform both up- and downstream in the supply chain. The participants know, which options they have should substances and their uses not be (pre)registered.

Content

- Background and objectives of REACH
 - Background and legal basis of REACH
 - Substances, preparations and articles
 - Phase-in substances and non-Phase-in substances
 - Timetable REACH
